→ Additional Information

I would like to receive more information regarding:

Planned Giving
 Giving through stocks or other financial instruments
 Creating a personalized fund
 I have already included the Université de Montréal in my will.
 I plan to include the Université de Montréal in my will.

→ Fund Description

The *alma mater* fund is of particular importance to the Faculty of Pharmacy. It is the tangible result of the support of several pharmacists, graduates and / or friends from the Faculty. Placed under the responsibility of the Dean, this fund aims to enable growth supported by our activities in particular, by the start-up of new projects and programs (eg Pharm.D.), by the upgrade of existing programs, through the development of continuing education, the development of new pedagogical approaches, including training tools; by recruiting trainers, and acquiring scientific equipment. This can also be concretely reflected, among other things, in the evaluation of our programs in order to make sure to follow the evolution of the discipline by taking into account the reality experienced in the practice environments, by assigning scholarships for student aid and the purchase of reference material.

→ Have you thought about a legacy gift?

It might be because you're passionate about music, the environment or social justice. Or because you want to contribute to advances in medical research, a reason for hope for so many people living with disease. Or maybe because you truly believe that higher education is essential for the development of society.

Whatever your reasons might be, a legacy gift can help you make your philanthropic dream a reality.

The team at the Alumni and Donor Community Office has the expertise to help you ensure that your planned legacy gift represents your values, interests and passions.

The Société du patrimoine unites, thanks and honours people who have committed to donate to Université de Montréal through a will or any other form of deferred gift (gift of shares and life insurance policy).
