

« Role of Immunity in Sterile Inflammation »

Paul Kubes, Ph.D.

Director : Calvin, Phoebe and
Joan Snyder Institute for Chronic Diseases
Professor : Dept. of Physiology and Pharmacology
Cumming School of Medicine
University of Calgary

Lundi, 15 février 2016
Pavillon Roger-Gaudry
11h00 – M-415

À l'invitation du professeur Marc Servant

I will use imaging techniques to demonstrate the rapid and spectacular recruitment of neutrophils into the site of sterile injury. How the neutrophils contribute to repairing the injury and ultimately their fate will be discussed. I will also demonstrate the role of monocytes and how they get locally educated to change their phenotype.

Here is a snapshot of the neutrophil imaging into the red sterile injury.
